

Maintenance Engineer F-35 Simulation Systems

TREALITY: leading manufacturer of high-end visual solutions

TREALITY SVS Belgium is an industry-leading provider of advanced simulation solutions for military aviation, offering a comprehensive suite of services and dedicated maintenance support specifically tailored to these cutting-edge systems.

At TREALITY, you contribute to a unique mission: our products and services ensure the **training of future pilots and individuals with extreme responsibility over the safety of others.**

Do you have affinity for military aviation technology?

We are currently looking for **Maintenance Engineers F-35 Simulation Systems.**

Function

In the role of Maintenance Engineer for Simulation Systems, you will play a critical role in ensuring the operational readiness and reliability of the installed F-35 simulation solutions.

Your expertise in troubleshooting and maintenance will contribute to the seamless operation of simulation systems, enabling realistic and effective training experiences for our Belgian jet fighter pilots.

Responsibilities:

- Perform maintenance, troubleshooting, and repair on simulation systems, including hardware, software, and associated components.
- Conduct routine inspections and preventive maintenance activities to ensure optimal performance and reliability of the simulation systems.
- Collaborate with a team of engineers and technicians to diagnose and resolve technical issues on-site.
- Utilize diagnostic tools, testing equipment, and software applications to identify and resolve system malfunctions.
- Stay updated with the latest technical information and documentation related to simulation systems and maintenance procedures.
- Develop and maintain comprehensive maintenance records, including work orders, maintenance logs, and system configurations.

- Collaborate with your peers and provide feedback on system performance and identify areas for improvement.
- Comply with applicable safety guidelines and regulations during maintenance activities.

Profile

TREALITY is looking for Maintenance Engineers.

We expect the following skills:

- Preferably you have a bachelor's degree in Electrical Engineering, Computer Science, or a related field.
- Some knowledge and experience in maintenance and troubleshooting of complex systems. Candidates who demonstrate a strong willingness to build up this experience will also be considered.
- Strong analytical and problem-solving skills, with the ability to quickly diagnose and resolve technical issues.
- Excellent organizational and time management skills, with the ability to prioritize tasks effectively.
- Ability to work independently as well as collaboratively in a team environment.
- Effective communication skills in English, both written and verbal, to interact with team members, customers, and stakeholders.
- Must be eligible to pass a clearance procedure due to the NATO secret installations.
- Proficiency in French is a plus.

Offer

At TREALITY, you will join a young, enthusiastic and progressive team. You will have the opportunity to work at an international level, with excellent conditions:

- A strong base salary, with the possibility of joining a Flexplan, where you can fill in part of your gross salary in a different way (choice of company car, company bicycle...);
- Commuting allowance, bicycle allowance...;
- Meal vouchers;
- Hospitalization insurance;
- Pension plan;
- On the job training

Place of employment

The work will be performed at the military base in Florennes.

Therefore, we are specifically looking for candidates who are

- residing in close proximity to the base or;
- willing to make the daily commute or;
- prepared to stay on site during the week (we provide accommodation)
